Sitewide Treatability Plan (TSP)

J.M. Kersh, Associate General Manager
Environmental Restoration and Waste Management
EG&G Rocky Flats, Inc

The Sitewide Treatability Plan (TSP) is due for submittal to EPA and CDH on June 3, 1991. EPA and CDH have a month to review and approve the TSP. Once the TSP is approved by EPA and CDH, the Interagency Agreement (IAG) stipulates that the TSP be implemented within 30 days.

Your staff have informed us that because the Categorical Exclusion (CX) that covers this type of activity is only proposed at this time, a mini-Environmental Assessment (mEA) and Finding of No Significant Impact/Finding of Significant Impact (FONSI/FOSI) will need to be prepared.

Because the IAG requirement for 30 days to implement the TSP after EPA and CDH approval, the mEA and FONSI/FOSI need to be prepared and coordinated with Headquarters (HQ) according to the attached schedule.

The attached schedule stipulates that the working draft mEA and FONSI/FOSI need to be prepared by May 29, 1991. A meeting at HQ with staff involved with review and approval of the mEA and FONSI/FOSI would need to occur the week of June 3 through 7, 1991. Please designate staff contacts from your NEPA and ER groups for this activity.

HQ staff would have until June 17, 1991 to comment on the working draft mEA and FONSI/FOSI. We would then have until June 25, 1991 to finalize the mEA and FONSI and retransmit to HQ.
